Employment

Web Development Intern

Aug 2023 – Present

Thaddeus Resource Center

San Dimas, CA

- Pioneer the transition of Thaddeus' website from Webflow to Next.js, which reduced website costs by 50%.
- Lead the mobile app development team of five interns to develop the organization's wellness and resources app.
- Develop reusable and responsive React components via TypeScript and Tailwind CSS used across 10 pages.
- Implement a CRUD for employees to create customizable popups that all site visitors can view.
- Meet with supervisors and other departments to update user requirements for the website's features and pages.
- Write unit tests using Jest and Cypress to check that the application's code is written correctly.
- Integrate Google Firebase's NoSQL database to read and write popup data.

Computer Technician

Apr 2024 – Jun 2024

eBryIT

Phoenix, AZ

- Imaged over 9000 Dell computers early by meeting a 2-month deadline in 4 weeks.
- Deployed imaged computers in over 15 Phoenix Union schools across Phoenix.

Information Technology Student Worker

Aug 2018 – Dec 2023

James E. Rogers College of Law

Tucson, AZ

- Resolved more than 300 ServiceNow and Cherwell user tickets by providing Tiers 1 and 2 support.
- Configured over 800 computers and peripherals for work use to improve employee productivity.

Education

The University of Arizona

Aug 2020 – Dec 2023

Bachelor of Science in Computer Science

Tucson, AZ

- Cumulative GPA: 3.973

Projects

Chat App Website

Apr 2024 – Jun 2024

- Created a chat app with flexible frontend customization using React, TypeScript, Vue.js, and MaterialUI.
- Hosted a containerized backend in Node.js and utilized Supabase to store data in a PostgreSQL database.
- Secured communications with end-to-end encryption so only senders and recipients could view their messages.

GitHub Visualizer

Sep 2023 – Dec 2023

- Provided a visual interface using Windows Forms and the .NET framework to write and modify Git repositories.
- Developed an API in C# to interact with the GitHub API to read and write to a user's local or remote repository.
- Employed Windows Credential Manager to store and retrieve the user's access token.

Spotify Music Player

Nov 2022 – Dec 2022

- Programmed Java methods to send HTTP GET and POST requests to the Spotify API to gather song information.
- Designed a user interface that can play Spotify tracks using JavaFX using design patterns like Singleton.
- Implemented the Authorization Code with PKCE flow so that Spotify users can log in to the application.
