Employment

Software Engineer I

Aug 2024 – Present

Ephibian, Inc.

Tucson, AZ

- Develop JavaScript and Java full-stack applications for clients with over thousands of customers.
- Utilize web libraries like React to improve existing systems and adapt to new requirements.
- Create components with frameworks like Tailwind CSS to visualize data such as donut charts and calendars.
- Write unit tests to ensure services and API endpoints are configured properly.

Web Development Intern

Aug 2023 – Aug 2024

Thaddeus Resource Center

San Dimas, CA

- Transferred Thaddeus's website from Webflow to Next.js and Node.js to reduce website hosting costs by 50%.
- Programmed responsive React components, via TypeScript and Tailwind CSS, that are used across 10 pages.
- Led the mobile app development team of 5 interns to develop a wellness and resources app.
- Implemented a CRUD for employees to create customizable popups for all site visitors.

Computer Technician

Apr 2024 – Jun 2024

eBryIT

Phoenix, AZ

- Imaged over 9000 Dell computers early by meeting a 2-month deadline in 4 weeks.
- Deployed imaged computers in over 15 Phoenix Union schools across Phoenix.

Education

The University of Arizona

Aug 2020 – Dec 2023

Bachelor of Science in Computer Science

Tucson, AZ

Projects

Chat App Website

Apr 2024 – Jun 2024

- Created a chat app with a customizable, responsive React frontend using Vue.js and MaterialUI.
- Hosted a containerized backend in Node.js to read and write to Supabase's PostgreSQL database.
- Secured communications with end-to-end encryption so only senders and recipients could view their messages.

GitHub Visualizer

Sep 2023 – Dec 2023

- Provided a visual interface using Windows Forms and the .NET framework to write and modify Git repositories.
- Developed an API in C# to interact with the GitHub API to read and write to a user's local or remote repository.
- Employed Windows Credential Manager to store and retrieve the user's access token.

Spotify Music Player

Nov 2022 – Dec 2022

- Programmed Java methods to send HTTP GET and POST requests to the Spotify API to gather song information.
- Designed a user interface that can play Spotify tracks using JavaFX using design patterns like Singleton.
- Implemented the Authorization Code with PKCE flow so that Spotify users can log in to the application.
